## **DETAILED ACTION**

## Allowable Subject Matter

2. Claim 1, 4-6, 8-11, 16, 19 and 20 allowed.

The following is an examiner's statement of reasons for allowance: Regarding claim 1, Forman et al 20040203645 discloses detecting that a connection is lost while a call between a telephone and a party is in progress; prompting via the telephone for a user-entered message in response to the detecting; saving the user-entered message until the connection is available; sending the user-entered message after the connection is available to the party of the call.

The instant invention discloses sending a transcript command from the telephone to a server after the connection is available, wherein the transcript command comprises a designated destination, a designated sender, and a designated receiver, wherein the transcript command requests the server to select previously-sent messages from a transcript stored at the server that were previously sent by the designated sender and were previously received by the designated receiver, wherein the transcript command further requests the server to send the selected previously-sent messages to the designated destination, wherein the, designated destination comprises the telephone. The above novel features in combination with the recited limitations of claim 1 are neither taught, suggested nor made obvious by Forman et al. Claims 6, 11 and 16 are allowable for the same reasons as described in claim 1 above.

Application/Control Number: 10/660,218

Art Unit: 2617

Claims 3, 5, 8-10, 19 and 20 are allowable based on their being dependent on claims 1, 6, 11 and 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
